Vanguard Strategy Group — Hiring Committee

Dear Vanguard Strategy Group Team,

Vanguard's recent work helping Ontario mid-market distributors digitize their logistics and optimize distribution channels shows that last-mile execution is where growth recommendations succeed or fail. I want to bring this same operational focus to Vanguard as a Business Analyst, combining structured business frameworks with hand-on quantitative modeling to deliver results that clients can act on.

As a Supply Chain Analyst Intern at Sobeys, I worked directly on distribution throughput. By writing SQL queries to join and clean regional inventory and labor tables, I isolated a critical shipping hand-off delay and designed a routing change that was projected to cut lead times by 12%. I compiled the operational metrics into a Tableau dashboard that Sobeys managers now use for their weekly reviews. This experience taught me that the best advisory work starts by talking directly to warehouse floor staff to ensure the model matches reality.

Beyond logistics, I have led student engagements at the Rotman Commerce Consulting Group, building bottoms-up demand models and structuring market entry issue trees. I am eager to apply this analytical foundation to Vanguard's operations and growth strategy teams.

Thank you for your time and consideration. I welcome the opportunity to discuss how my supply chain optimization and data dashboarding experience align with Vanguard's client projects.

Sincerely,

Priya Raman
